PROFESSIONAL SUMMARY

Artificial Intelligence & Machine Learning undergraduate skilled in Python, JavaScript, FastAPI, PostgreSQL, and REST APIs, with hands-on experience in workflow automation and full-stack web development. Growing focus on AI/ML and Generative AI applications, backed by practical projects and industry certifications.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, Bootstrap

Backend: FastAPI, Node.js, PostgreSQL, REST APIs

AI / ML: Machine Learning Fundamentals, Generative AI, Data Analytics

Tools & Platforms: Docker, Git, GitHub

EXPERIENCE

Software Development Intern

Jun 2026 – Jul 2026

TASC Outsourcing

Built internal automation and front-end tooling to remove manual, repetitive work and improve delivery speed and accuracy.

- **Automated bulk email delivery** — designed and shipped a one-click C# (.NET) desktop tool that replaced a slow, manual process, sending personalized, PDF-attached emails through Outlook via COM automation.
- **Made it configuration-free** — engineered header-based Excel parsing that auto-detects the latest workbook and reads each field correctly regardless of column order or file name.
- **Guaranteed send accuracy** — added a pre-send confirmation that previews every outgoing email and flags any row missing a PDF or address, preventing incomplete or misdirected sends.
- **Built a full audit trail** — implemented timestamped logging that records every sent, skipped, and failed email with the exact reason, making each run traceable and easy to debug.
- **Ensured reliability** — attached to the open Excel instance with a read-only fallback to avoid file-lock failures on machines where the source sheet stays open.
- **Delivered responsive UI** — developed clean, reusable web layouts in HTML5, CSS3, and Flexbox using a consistent component and spacing system, version-controlled end to end with Git and GitHub.

Technologies: C# / .NET, HTML5, CSS3, JavaScript, Bootstrap, Git, GitHub, VS Code, Microsoft Excel & Outlook Automation

PROJECTS

AI-Based Smart Attendance System

Python, OpenCV, MediaPipe, Flask, Pandas

Real-time face-recognition attendance system that detects and marks student attendance automatically via webcam, storing records to CSV and surfacing them through a live dashboard — removing manual roll-call and proxy attendance.

CERTIFICATIONS

- Introduction to Machine Learning — Kaggle, 2026
- Introduction to Generative AI — Google Cloud, 2026
- GenAI-Powered Data Analytics Job Simulation — Tata (Forage), 2026
- Python Essentials — Cisco Networking Academy, 2026

EDUCATION

B.E. in Artificial Intelligence & Machine Learning

Expected 2028

S A Engineering College, Chennai

Higher Secondary (Class XII) — 83%

2023

Velammal Matriculation Higher Secondary School

Secondary (Class X) — 75%

2021
